MICHELIN XAD 65

The optimum tyre solution for articulated dump trucks on yielding surfaces

Mobility (flotation, traction)

Productivity +20% life increase

Improved working characteristics

MICHELIN XAD 65

The optimum tyre solution for articulated dump trucks on yielding surfaces

Sizes	Tread depth	
	mm	32 rd inch
650/65 R 25 SUPER E3T TL 180B	40	50.4
750/65 R 25 SUPER E3T TL 190B	43	54.2
850/65 R 25 SUPER E3T TL 196B	47	59.2
775/65 R 29 SUPER E3T TL 195B	45	56.7
875/65 R 29 SUPER E3T TL 203B	51	64.3

7 MOBILITY (FLOTATION, TRACTION)

- High degree of flotation
- Lower contact pressure derived from a greater surface area in contact with the ground
- Increase in traction (#)
- Tread pattern composed of blocks with multiple faces and with a high void to tread block ratio
- Larger surface area in contact with the ground
- Excellent degree of mobility
- Lower ground contact pressure
- A tread pattern specifically designed to envelop surface irregularities and obstacles

7 PRODUCTIVITY +20% LIFE INCREASE (#)

- 20 % gain in life ^(#)
- Reduced ground contact pressure which creates an optimised force distribution
- Reduced tyre consumption
- Lower inflation pressure required for a given load which increases shock absorption and reduces accidental tread damage.

7 IMPROVED WORKING CHARACTERISTICS

- Better stability
- Lower sidewall height (wide base tyre)
- Optimised radial rigidity
- Lateral rigidity increased by 10% (#)
- Improved machine comfort
- More rounded profile
- Reduced ground contact pressure

(#) compared to XADN

REPAIRABILITY AND RETREADABILITY MAXIMIZED THANKS TO THE EXTREME RELIABILITY OF THE CASING (##)

(##) provided that the worn tyre answers criteria of retreading and/or repair.

BENEFITS OF THE MICHELIN® RADIAL TECHNIQUE

longer tyre life
better traction on all types of surface
lower fuel consumption
improved comfort
increased resistance to punctures / flats
increased heat resistance
